Ocean - Wikipedia An ocean (from Ancient Greek ὠκεανός, trans. Okeanós) is a body of saline water that composes much of a planet's hydrosphere. On Earth, an ocean is one of the major conventional divisions of the World Ocean. These are, in descending order by area, the Pacific, Atlantic, Indian, Southern (Antarctic), and Arctic Oceans. Oceans & Coasts | National Oceanic and Atmospheric ... Climate change, sea level rise, more intense storms, and population growth are all challenges for our coastal communities. The National Ocean Service helps decision makers find solutions. We are the nation's leader in observing, measuring, assessing, protecting, and managing coastal, ocean, and Great Lakes areas. Ocean - Britannica.com Ocean: Ocean, continuous body of salt water held in enormous basins on Earth's surface. There is one "world ocean" but researchers often consider it five: the Pacific, Atlantic, Indian, Arctic, and Southern oceans.

Ocean.com Ocean.com. Ocean Habitat - Kids A sea, however, is a small area of an ocean, usually with land on several sides. The Mediterranean, nestled between Africa and Europe, the Baltic in northern and central Europe, and the Caribbean between North, Central, and South America are all seas. Oceans Information and Facts | National Geographic Smaller ocean regions are called seas, gulfs, and bays, such as the Mediterranean Sea, Gulf of Mexico, and the Bay of Bengal. Stand-alone bodies of saltwater like the Caspian Sea and the Great Salt Lake are distinct from the world's oceans.

Climate Change Indicators: Oceans | Climate Change ... Covering about 70 percent of the Earth's surface, the world's oceans have a two-way relationship with weather and climate. The oceans influence the weather on local to global scales, while changes in climate can fundamentally alter many properties of the oceans. Ocean - Simple English Wikipedia, the free encyclopedia An ocean is a large area of salt water between continents. Oceans are very big and they join smaller seas together. Together, the oceans are like one "ocean", because all the "oceans" are joined. Oceans (or marine biomes) cover 72% of our planet. The largest ocean is the Pacific Ocean. It covers 1/3 (one third) of the Earth's surface. Big and small fish of different types live in oceans.
