Fractal scanning path generation and control system for ... A fractal scanning path which is a FASS (space-filling, self-avoiding, simple and self-similar) curve is proposed for selective laser sintering (SLS). Research on fractal-scanning path for arbitrary boundary ... The fractal curve is proposed as a novel scanning-path used in Layered Manufacturing. Aiming at a limitation that the fractal curve can only fill a square region, a method is developed to realize the trimming of fractal curve in arbitrary boundary layer by means of judging intersection points. Fractal scanning path generation and control system for ... First, from the initial node, the fractal path is traversed, while the first intersection point is encountered, the scanning beam enters the boundary $\hat{\sim}$ walking $\hat{\sim}$ ™ along the fractal curve, until the second intersection point is reached.

Fractal scanning path generation and control ... - DeepDyve A fractal scanning path which is a FASS (space-filling, self-avoiding, simple and self-similar) curve is proposed for selective laser sintering (SLS). The authors's™ preliminary research has proved that the samples which are produced by SLS along a fractal scanning path possess improved physical performance.
